#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 20 August 2003.
- 2a) This action is FINAL.                            2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Specification*

The application has not been checked to the extent necessary to determine the presence of all possible typographical and grammatical errors. Applicant's cooperation is requested in correcting any errors of which he/she may become aware in the application.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 12 and 16 are rejected under 35 U.S.C 102 (b) as being anticipated by Medlock et al (US 6,567,017).

Medlock et al teach in figures (1A) and (2A) an apparatus and method for generating a channelization code, the apparatus including:

a binary counter (202) that receives a spreading factor (See column 41, lines 41-43) signal and a clock signal, provides a binary count signal that is responsive to the clock signal, and resets itself when the binary count signal reaches a limit that is associated with the spreading factor signal, wherein the binary count is compared to a limit number and incremented when the count is less than the limit number(See figure 8E);

a microprocessor/logic circuit (130) that is arranged to receive a code number signal and the spreading factor signal (See column 41, lines 41-43) and provide a right-justified code in response to the code number signal and the spreading factor signal, wherein the right-justified code signal corresponds to a right-justified version of the code number signal;

a register circuit (120) that is arranged to receive the right-justified code signal and the clock signal, store the right-justified code signal in response to the clock signal, provide the stored right-justified code signal as a stored code signal; and,

a channelization logic circuit (114A) that is arranged to receive the stored code signal and the binary count signal, logically calculate and provide the channelization code in response to the stored code signal and the binary count signal such that the channelization code is associated with the code number and the spreading factor) (See column 41, lines 42-56).

Allowable Subject Matter

Claims 2-11, 13-15 and 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
